

The project **CUMED** (“*Analysis for the implementation of innovative ecologic roofs and façades in cities with Mediterranean weather*”) file number **IPT-2011-1017-310000**) has as main objective, under the leadership of VIAS (ACS Group) and with the participation of DRAGADOS (ACS Group), the acquisition and implementation of new constructive and botanical technologies to fabricate roofs and façades which are ecological, easy to maintain and suitable for cities with Mediterranean weather. The consortium counts as well on the collaboration of IRTA (Food and agriculture research and technology – Generalitat of Catalunya), UIB (University of the Balearic Islands), IRNAS - CSIC (Institute of Seville for Natural Resources and Agrobiology), CEBAS-CSIC (Edaphology and Biology applied research Center). The project is co-funded by the Spanish *Ministerio de Economía y Competitividad* (**MINECO**) within the National Scientific Research, Development and Innovation Plan 2008-2011 (**INNPACTO 2011**) and the European Union through the **FEDER FUNDS** (Regional Development European Funds)
