

Project "**CATALOGUE OF PRODUCTS FOR TRAFFIC MANAGEMENT FROM OBJECTIVE AND REAL TRIP TIME MEASUREMENTS (GESTTOR)**", file number **RTC-2014-1473-4**, led by SICE and where **DRAGADOS** (ACS Group ) and UPM (Polytechnic University of Madrid) are partners. The main objective is to create a catalog of products for traffic management based on real trip time measurements that optimally exploits the available information. The project has been funded by the Ministry of Economy and Competitiveness (MINECO) within the program **Retos-Colaboración (2014)** belonging to the State Program for Research, Development and Innovation Oriented to the Challenges of Society, under the framework of the State Plan for Scientific and Technical Research and Innovation 2013-2016.
