

The REHABCAR Project “**UPGRADING OF ROADS AND MOTORWAYS**” (file number **IPT-370000-2010-029**) intends to develop, under the leadership of **DRAGADOS** (ACS Group), technologies and tools for inspection, evaluation, design and construction of the transport infrastructure upgrading, focusing on improving (strengthening, repair, widening) of pavements and bridges and reusing the existing structures and materials in order to minimize resource consumption. For this development DRAGADOS counts on the collaboration of the client IRIDIUM, four industrial partners GEOCISA, TORROJA INGENIERÍA, ASFALTOS AUGUSTA, CTT-STRONGHOLD and four research partners CARTIF, CSIC-CISDEM, Polytechnic University of Catalunya and University of Cantabria. The project is co-funded by the Spanish Ministerio de Economía y Competitividad (**MINECO**) within the National Scientific Research, Development and Innovation Plan 2008-2011 (**INNPACTO 2010**) and the European Union through the **FEDER FUNDS** (Regional Development European Funds)
