SUPPLIERS APPROVAL SYSTEMS

- Business Partners must expressly accept (by signature and commitment to compliance) the content of the **Code of Conduct for Business Partners**. Thus, in 2021, of the **80,328** direct suppliers the Group works with, **86.1%** of them have accepted the ACS Group Code of Conduct by signature or a similar method, and **7.5%** of the suppliers have received training in this regard.
- Companies representing **91,6%** of the ACS Group's procurement costs present a formal system for the approval of suppliers and subcontractors. The main concepts used for supplier approval are:
 - **Average payment and collection periods.**
 - **Technical capacity and suitability to perform the planned task.**
 - **History of fulfilment of contractual clauses in their prior relationship with ACS.**
 - **ESG aspects related to compliance with the Code of Conduct for Business Partners.** The weight of ESG factors in the approval process varies according to the companies' activities and action areas, but the weighted average weight of these factors exceeds 38.4% in 2021. Specific aspects assessed include certificates on environmental aspects (ISO14001, EMAS or the like), certification on quality aspects (ISO 9001 and the like), adherence to international human rights and labour rights standards and analysis of the labour standards and practices of suppliers and subcontractors, among others.
 - In 2020, 33.9% the suppliers with which the Group has worked have adhered to ethical, social and environmental commitment standards or have certificates in this area.
- The ACS Group's **2025 Sustainability Master Plan** sets out the initiatives and objectives to ensure responsible management of the supply chain, through the extension and supervision of best ESG practices in the supply chain, value creation for the local community and reduction of environmental impact.
